

MetroSil RP 3 - 150/4.0

6.01070.420

The MetroSil RP 3 - 150/4.0 is a medium-capacity "Reversed Phase" column for universal applications that can be used not only with aqueous eluents, but also with aqueous samples. This property is especially important for applications in ion chromatography. The MetroSil RP 3 - 150/4.0 can be used to solve application problems that lie in the transition area between high-performance liquid chromatography and ion chromatography. The MetroSil RP 3 material is an "endcapped" C18 silica gel with a pore width of 120 angstroms.

Below, the accessories are grouped into Scope of delivery and Optional accessories.
Please keep this printout at hand for ordering replacement material.
These lists may be subject to change.
