

Eluent producer cartridge A

6.02850.200

The eluent producer cartridge A (EPC A) produces the high-purity hydroxide eluent from the 4 mol /L hydroxide concentrate, based on water electrolysis. The cation exchanger diaphragm enables the selective migration of cations into the eluent. The EPC A is fed ultrapure water, which can be operated fully automatically in connection with a water processing system.

Below, the accessories are grouped into Scope of delivery and Optional accessories. Please keep this printout at hand for ordering replacement material. These lists may be subject to change.
