

Hamilton RCX-30 - 250/4.6

6.1018.000

The Hamilton RCX-30 - 250/4.6 is a column for separating monosaccharides, disaccharides and sugar alcohols. It is an anion exchange column based on polystyrene-divinylbenzene resin. The RCX-30 - 250/4.6 can be used for universal applications.

The Hamilton RCX-30 - 250/4.6 separation column exhibits an outstanding separation of fructose and lactose. The column also offers the advantage that flows of up to 2 mL/min can be used in order to accelerate the chromatography. The long version of the column (250 mm) is preferred for the determination of small carbohydrates (monosaccharides, disaccharides and sugar alcohols).

Below, the accessories are grouped into Scope of delivery and Optional accessories.
Please keep this printout at hand for ordering replacement material.
These lists may be subject to change.

Optional accessories

6.1011.030

Metrosep RP 2 Guard/3.5

The Metrosep RP 2 Guard/3.5 is a guard column for universal use. It reliably protects the analytical separation column against contamination. It reliably protects the analytical separation column against contamination, removing the smallest particles, traces of iron oxide and bacteria. The Metrosep RP 2 Guard/3.5 helps to reduce costs; its filter disk can be replaced very easily.

6.1011.040

Metrosep RP 3 Guard HC/4,0

The Metrosep RP 3 Guard HC/4.0 is a guard column for universal use. It reliably protects the analytical separation column against contamination, securely removing lipophilic organic contamination, the smallest particles, traces of iron oxide and bacteria. The guard column is based on a polymer material and thanks to its larger pack volume, has a significantly higher capacity than the Metrosep RP 2 Guard/3.5. It can be used throughout the entire pH range.
