

Metrosep A Supp 16 - 150/4.0

6.1031.420

The Metrosep A Supp 16 is ideal for high-capacity separation problems and distinguishes itself with its outstanding resolution. The Metrosep A Supp 16 - 150/4.0 is based on a surface-functionalized polystyrene-divinylbenzene copolymer. The functional groups are bonded covalently.

The Metrosep A Supp 16 - 150/4.0 is characterized by outstanding resolution and solves the most difficult separation problems. The column is very well-suited to applications that have a high ionic load but that do not require the highest resolution. It is one of the standard columns in anion chromatography.
