

Metrosep C Supp 1 - 250/4.0

6.1052.430

The Metrosep C Supp 1 - 250/4.0 separation column is used for difficult separations of standard cations, some transition cations and amines in the low concentration range. Conductivity detection after sequential suppression allows low detection limits thanks to low baseline noise.

Below, the accessories are grouped into Scope of delivery and Optional accessories.

Please keep this printout at hand for ordering replacement material.

These lists may be subject to change.

Optional accessories

Order no.	Description
-----------	-------------

The Metrosep C Supp 1 Guard/4.0 contains the C-Supp-1 column material and is used to protect Metrosep C-Supp-1 cation columns. Particles and contamination are reliably retained, considerably prolonging the service life of the analytical separation column. The Metrosep C Supp 1 Guard/4.0 also works based on the "On Column Guard System" and is screwed directly onto the separation column with virtually no dead volume.
