

Combustion Module (Oven + LPG/GSS, AJ)

2.136.0730

The Combustion Module (Oven + LPG/GSS, AJ) enables sample digestion during the pyrolysis of liquefied gases and gases under pressure. The Combustion Module (Oven + LPG/GSS, AJ) is comprised of the combustion oven and the LPG/GSS module. Both are products of Analytik Jena which have been optimized specially for coupling with ion chromatographs.

Qt.	Order no.	Description
1 PCS	1.136.0700	Combustion Module (Oven + ABD, AJ)

The LPG/GSS Module (AJ) is a sample injection system for either liquefied gases or gases under enhanced pressure. The module is controlled automatically and moves the respective amounts of gas to the combustion oven for combustion. The Analytik Jena product has been optimized specially for coupling with ion chromatographs.

Connector for connecting the LPG/GSS module (AJ) to the combustion oven. For Metrohm Combustion IC.
