1 PCS	1.802.0010	802 Rod Stirrer for 727 Ti Stand
		Rod stirrer with separate 6.2137.000 Speed controller and 6.1909.010 Propeller stirrer.

Basic model for setting up customer-specific automation in the titration. Space-saving Robotic Sample Processor XL with integrated Titrando, one workstation including Swing Head and two built-in membrane pumps. The programming of the methods is accomplished by means of the handy Touch Control or with the tiamo™ titration software.

Fluoride-selective electrode with crystal membrane.

This ISE has to be used in combination with a reference electrode and is suitable for:

- ion measurements of F^- (10^{-6} mol/L to sat.)
- ion measurements in small sample volumes (minimum immersion depth 1 mm)
- titrations

Thanks to the robust/break-proof plastic shaft made of EP, this sensor is mechanically very resistant.

Silver / silver chloride reference electrode with double junction system.

This reference electrode is well suited for:

- automated applications
- ion measurements
- surfactant titrations

The ground-joint diaphragm, which is insensitive to contamination, offers a constant and reproducible electrolyte outflow. Additionally, the reference electrolyte is gelified for even better signal stability. The sensor is delivered with $c(KCl) = 3$ mol/L as bridge electrolyte, which can be freely selected and exchanged as needed.
