

Ag Titrode with AgCl coating

6.00430.100CL

Combined silver ring electrode with a pH glass membrane as reference electrode. The silver ring is coated with chloride (AgCl) for a higher sensitivity and a better limit of detection. This maintenance-free electrode is suitable for precipitation titrations when the pH value remains constant (titrant silver nitrate), for example of:

- chloride, bromide, iodide
- sulfides
- hydrogen sulfide
- mercaptans
- cyanides

This electrode is stored in distilled water.
