

iAg Titrode with AgBr coating

6.00470.300BR

Intelligent, combined silver ring electrode with a pH glass membrane as reference electrode and integrated memory chip for storing sensor data.

The silver ring is coated with bromide (AgBr) for a higher sensitivity and a better limit of detection. This maintenance-free electrode is suitable for precipitation titrations when the pH value remains constant (titrant silver nitrate), for example of:

- Chloride, Bromide, Iodide
- Sulfides
- Hydrogen sulfide
- Mercaptans
- Cyanides

This electrode is stored in distilled water.

iTodes can be used on Titrand, Ti-Touch oder 913/914 meters.
