

"ProfIC 7 – Cation" – Professional IC System with Inline Dilution and Dialysis

ProfIC-07-Cation

The professional IC system with conductivity detection enables the fully automatic determination of cations and anions (non-suppressed) that are present in high concentrations and are also loaded with a very critical matrix. Emulsions, samples containing fats and proteins or heavily contaminated waste waters are not always compatible with ion chromatography, even after upstream filtration. That is why the "ProfIC 7" is equipped with the Metrohm-patented Inline Dialysis (European Patent 0 820 804, US Patent 5,861,097).

6.1050.420	Metrosep C 4 - 150/4.0	The Metrosep C 4 - 150/4.0 is the universal standard column in cation analysis for accomplishing high separating efficiency in a short time. The Metrosep C 4 - 150/4.0 is the ideal separation column for the analysis of alkaline and earth alkaline metals in aqueous media. 
6.1050.500	Metrosep C 4 Guard/4.0	The Metrosep C 4 Guard/4.0 contains the C-4 column material and is used to protect all Metrosep cation columns that have a substrate based on silica gel. Particles and contamination are reliably retained, considerably prolonging the service life of the analytical separation column. The economical price is an additional plus. The Metrosep C 4 Guard/4.0 also works based on the "On Column Guard System" and is screwed directly onto the separation column with virtually no dead volume.
